Clean, story-first edits that keep people watching.

I edit long-form YouTube videos and short-form clips for experts, coaches and creators. I produce a weekly podcast and edit my own creator content, so I know how to keep a real person's voice front and center while making every video feel polished.

HOW I WORK

- Your footage stays private. I never share it or use it in my portfolio without written permission.
- Expert and medical content is never cut, reordered or reworded. If I'm unsure, I leave it in and flag it.
- You approve the final wording of every text callout and on-screen card.
